

ARCHITECTURAL RECORD

8" with an aspect ratio specified. The gypsum-based tiles must be sealed with a suitable sealer for outdoor use; for indoor applications, the tile should be sealed with wax or a clear acrylic spray to prevent oxidation. While the tiles are for wall applications only, floor tiles will be made available in the future. In addition to ceramic, metal, and gypsum-based tiles, the company works in a range of materials, including rubber, plastic, and clear acrylic. ◀ Luminous panels

GranitiFiandre has expanded its tile and stone product range to include Geologica luminous panels. The panels are designed for installation on floor, wall, or ceiling surfaces. A stainless-steel frame surrounds the structure, which is created with opalescent, tempered glass that can withstand foot traffic. Color options include amber, white, and blue in 12"- or 16"-square panels. The thin panels use four high-intensity LEDs. GranitiFiandre, Itasca, Ill. www.granitifiandre.com **CIRCLE 224**

◀ Airplane-inspired airport seating

The Bernú public seating collection takes its name from Daniel Bernoulli, an 18th-century Swiss scientist who discovered the Bernoulli principle, which students of physics and aerodynamics learn is the reason airplanes fly. Constructed of cast aluminum and steel components, its engineering is based on a "peg" system that simplifies assembly and results in a completely modular system. In addition to the usual straight row units, Bernú will be available in curved configurations (left). The closed loop arm is in the shape of an airplane wing in cross section. Upholstery options include vinyl, faux leather, leather, and woven textiles. Arconas, Ontario. www.arconas.com **CIRCLE 225**
