Aeronautical shapes combine to create a sense of flight in the Bernù beam seating system.

- Cast aluminum and steel construction ensure durability and low maintenance.
- Innovative peg system affixes seats to beam without the clutter of exposed fasteners, allowing for quick installation and easy maintenance.
- 2-6 seat straight units, 4 and 5 seat curved units, tables and optional arms available.
- Unique curved beam units can be combined to create dynamic curvilinear seating layouts.
- Adjustable glides offer precision levelling and can be floor fastened upon request.

Finishes

- Cast aluminum components are satin with bright polished accents.
- Steel components are epoxy coated.
- Available for outdoor use.

Upholstery

- Seats are available fully upholstered, with seat pad only or without upholstery.
- Upholstered pads are slip-covered for easy replacement.
- Upholstery options include: vinyl, faux leather, leather and woven textiles.
