

ARCONAS®

Innovative Leader in Seating

logistics lounge

designer: Douglas Ball
Patented

Good looking, generous, intelligent, multi-faceted. A very likeable lounge.

Most people might think that creating a completely portable, flexible and beautiful, all-in-one table, storage unit and chair would have been enough. But once The Logistics Chair was launched, designer Douglas Ball just kept on thinking about it.

And what was he thinking about were those comfortable, informal, spontaneous office discussions. You know the kind. A co-worker drops by, and together, you come up with a really winning notion - one big, beautiful, smart idea. Kind of like The Logistics Lounge. The big, beautiful and smart idea about work.

The Logistics Lounge is a mobile lounge chair with optional swingaway tablet arm. Suitable for lounges, collaboration and reception settings. The seat angle adjustment supports user in infinite positions. The swingaway tablet arm and optional storage shelf is available in three timeless finishes. Upholstery options include: vinyl, faux leather, leather and woven textiles.

The Logistics Lounge. Because some of the best decisions aren't made in the meeting room.

logistics lounge

Generous frame, deep padding

Lush upholstery

Swingaway tablet arm

One-touch, pneumatic cylinder control

Tidy shelf

Easy-roll, out-of-the-way casters

Generous frame, deep padding

Tubular steel body frame molded into CFC-free, fire retardant, cold-cured High Resiliency Urethane. Rigid Urethane glass reinforced arm frame over steel.

Lush Upholstery

Lets you contemplate the situation in comfort. Upholstery options include: vinyl, faux leather, leather and woven textiles.

Swingaway Tablet Arm

Puts your thinking tools right up front, where you want them, when you want them. Tablet arm available in three timeless finishes - maple, pear and red mahogany.

Tidy shelf

Neatly stores away your briefcase, knapsack, laptop, purse, all the baggage of a busy schedule. Tidy shelf available upholstered or as wood veneer.

One-touch, pneumatic cylinder control

Supports your back and your decision process. Lean forward, recline back, adopt any position in between. Just how you think best. One-touch pneumatic cylinder control adjusts body of chair to 14 degrees recline.

Easy-roll, out-of-the-way casters

Because flexible room arrangements encourage flexible thinking. Optional soft wheel and locking casters or glides are available to meet user requirements.
