

ARCONAS

Bernù®
Bench

DESIGNED BY DAVIDE TONIZZO

Bernù® Bench

Available in fixed widths (48 and 72 inches), this finely-crafted bench can be arranged with (or without) other Bernù seat variations to create dynamic and inviting waiting areas. The bench seat, available in hardwood slats or upholstery, has ends profiled like an aircraft wing section. The graceful sculpting of the aluminum beam and legs of the bench suggests both refinement and sturdiness.

Bernù bench is suitable for indoor applications only.

Bernù upholstered bench is available with a variety of durable vinyls and faux leathers, woven textiles or COM.

72" Upholstered Bench

48" Upholstered Bench

72" bench shown in maple

48" bench shown in oak

72" bench shown in walnut

Wood Options

The wood bench is made from hardwood slats and is clear coated for added protection.

- Steel supports

GLIDES

- Adjustable
- Antislid glide for hard floors
- Floor mounting

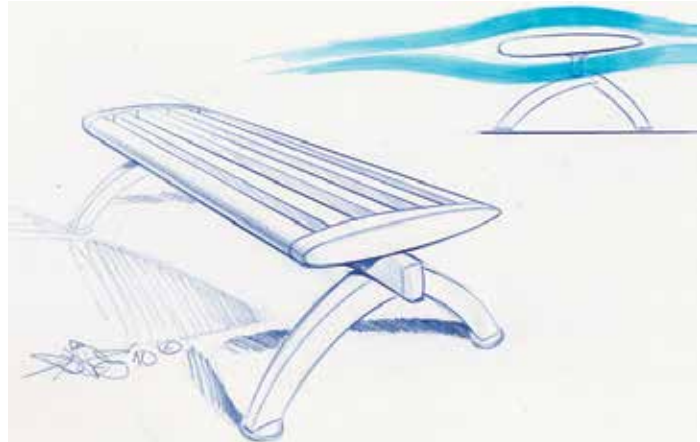

FINISH

Wood

- Clear coated

Upholstered pad

- Vinyl, polyurethane, leather, woven textile or COM

“The Bernù bench end plates is derived from airfoil shapes used on other components of the Bernù Collection. The idea of using slats came about while looking at the internal structures of early, lightweight airplane wings. The thought of using less material appealed to me from an environmental standpoint. As well, it gave the piece a more airy, transparent look.”

Daide Tonizzo's inspiration for the bernù bench design.
